

[Signature]

a pen type object for indicating a position on the book and receiving radio waves sequentially emitted from the plurality of antennas at the indicated position;

an image device for taking an image of the mark on each page of the book;

a detection unit for detecting the position indicated by the pen type object based on the level of the received radio waves and detecting the page number of the book based on the image data of the mark; and

an output unit for outputting the information corresponding to the detected position of the page with the detected page number.--

REMARKS

Favorable consideration of the application with claims 1-47 is respectfully requested.

Dated: September 6, 2000

Respectfully submitted,
